

Ewa Ramus

Software Engineer II | Frontend / Product Engineer | React · TypeScript · UX Quality

Warsaw / Remote EU | +48 502-924-023 | ekaramus@gmail.com | linkedin.com/in/ewa-ramus | github.com/ekaramus | ekaramus.github.io

PROFESSIONAL SUMMARY

Frontend / Product Engineer with 5+ years of Microsoft experience building React and TypeScript experiences for Skype and Teams MSA. Strong in product-minded UI engineering, accessibility, maintainable frontend architecture, rollout quality, and cross-functional collaboration. Experienced in distributed teams, mature production codebases, and turning ambiguous product needs into reliable, user-centered frontend solutions. Currently building production-style portfolio projects that demonstrate end-to-end ownership across UX, typed domain modeling, testing, Supabase-backed flows, and AI-powered transcription.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript ESNext, HTML, CSS

Frontend: React, Next.js, browser APIs, responsive UI, accessibility, design systems, Tailwind CSS, styled-components

Architecture & State: typed UI state, feature-based architecture, domain modeling, API boundaries, React Query, Supabase, feature flags, staged rollout thinking

Testing & Quality: Vitest, React Testing Library, unit testing, component testing, integration testing, code reviews, documentation, regression prevention

Tools: Git, GitHub, VS Code, Copilot, ChatGPT, Claude, CI/CD workflows, Vite, Webpack

PROFESSIONAL EXPERIENCE

Microsoft - Software Engineer II

Jan 2021 - Present | Prague, Czech Republic / Hybrid | Skype, Teams MSA

- Build and improve user-facing features in large-scale communication products using React, TypeScript, modern JavaScript, and browser technologies.
- Deliver frontend changes in mature production codebases with focus on accessibility, UX quality, maintainability, release safety, and regression prevention.
- Contributed to the upgrade of a sensitive user-reporting flow, owning frontend implementation details, accessibility improvements, cross-team coordination, and user experience quality within privacy and security constraints.
- Improved codebase health by removing obsolete code paths, cleaning experiment and feature-flag naming, and documenting repeatable cleanup patterns for other engineers.
- Supported safer product delivery through feature flags, staged rollout thinking, production-readiness checks, and careful handling of edge cases.
- Collaborate with product, design, backend, privacy, security, and accessibility stakeholders in distributed team environments.
- Acted as Scrum Master from 2021 to 2024, facilitating agile practices, improving communication, increasing delivery visibility, and helping remove team blockers.

Neuro Device Group - Technical Specialist | Product & Interactive Systems

Mar 2015 - Oct 2019 | Warsaw, Poland

- Worked at the intersection of product demonstrations, research systems, and user support for eye-tracking, EEG, ECG/EKG, PPG, VR, and psychophysiology technologies.
- Co-prepared visual experiments and multi-device research setups for museum, consumer lab, education, and clinical-trial contexts.
- Led and supported dozens of workshops and demos for students, researchers, marketers, and children, translating complex technical systems into clear, approachable user-facing experiences.

INDEPENDENT PROJECTS

VoicePin - Voice-first messaging MVP with automatic transcription

React · TypeScript · Next.js · Tailwind CSS · Supabase · ElevenLabs Speech-to-Text · Vitest | github.com/ekaramus/voicepin

- Building a mobile-first voice messaging app focused on ultra-short recordings, automatic transcription, private audio storage, and lightweight 1:1/self conversations.
- Implemented core product flows including recording lifecycle, draft/send states, destination picker, persisted conversation detail, custom audio playback, transcription states, and visible error handling.
- Integrated Supabase authentication, database, storage, realtime updates, user-owned data model, RLS fixes, signed audio access, and server-side transcription handling.
- Focus areas: audio UX, product constraints, accessibility, security-minded frontend, typed state, API boundaries, and production-style error handling.

VibeCheck - Production-style daily productivity and energy tracker

React · TypeScript · Next.js · Supabase · React Query · Vitest · Tailwind CSS | github.com/ekaramus/vibecheck

- Building a daily check-in app with morning energy, optional goals, evening reflection, partial-completion states, and a guided dashboard flow.
- Designed typed domain models and derived status logic for realistic user behavior, including empty, planned, in-progress, missed, and completed states.
- Implemented Supabase SSR authentication, RLS-protected user-owned data, server-side data access, API/data mappers, React Query hooks, and focused unit/component tests.
- Focus areas: product-minded frontend architecture, domain modeling, testable business logic, calm UX, and maintainable data boundaries.

Personal Portfolio - Frontend/product engineering portfolio

Astro · React islands · TypeScript · Tailwind CSS · MDX · GitHub Pages | ekaramus.github.io

- Built a personal portfolio website to present selected product-focused frontend projects, case studies, experience, and contact information.
- Uses Astro, React islands, TypeScript, Tailwind CSS, reusable UI components, project pages, and GitHub Actions deployment to GitHub Pages.

EDUCATION

Warsaw University of Technology - Master of Engineering, Biomedical Engineering

Graduated 2015 | Warsaw, Poland

TARGET ROLES

Frontend Engineer · Product Engineer · Software Engineer - Frontend · React/TypeScript Engineer · AI Product Frontend Engineer
